## 1. Getting Started & Portal Access

Welcome to the **HydraSpecma India Multi-Department Budget & Asset Monitor** portal. This web platform provides complete transparency across expenditure, hardware/software asset tracking, invoice records, and Microsoft D365FO ERP integration for **all 9 independent departments** across HydraSpecma India.

### 1.1 Supported Independent Departments:

- **Every Department Managed Independently:** Finance, Human Resources (HR), Purchase & Procurement, Quality & Safety, Sales & Commercial, Operations, Production & Manufacturing, Logistics & Supply Chain, and Information Technology (IT).

### 1.2 How to Log In & Select Department:

1. Open your web browser and navigate to <https://it-asset-phi.vercel.app/login>.
2. Enter your registered HydraSpecma email address (\*e.g., user@hydragrene.com\*).
3. Enter your password. First-time users will be prompted to reset their password upon initial login.
4. At the top right header, use the **■ Dept:** dropdown selector to select your target department.

## 2. Employee & Personal Asset Tracking (/assets)

Every HydraSpecma staff member can access the **Asset Register** module to track hardware and equipment assigned to them in their department:

- **My Assigned Assets:** View laptops, workstations, monitors, mobile devices, tools, and accessories assigned to your employee account.
- **Equipment Specifications & Identifiers:** Inspect serial numbers, model names, asset tags, and ERP fixed asset numbers (`FixedAssetNumber`).
- **Warranty & Replacement Dates:** Track warranty end dates, AMC contracts, and scheduled equipment replacement timelines.

- **Scope Classification:** Identify whether equipment is classified under **Local** department scope or **Global** corporate scope.

### 3. Department Budget & Financial Monitoring (/budgets)

The **Budget vs Actual** module provides category-by-category breakdown of department expenditure separated into **CapEx** (Capital Expenditure) and **OpEx** (Operating Expenditure):

- **CapEx (Capital Expenditure):** Long-term equipment investments, machinery, hardware, and plant assets.
- **OpEx (Operating Expenditure):** Recurring operating costs such as software subscriptions, licenses, maintenance, and service contracts.
- **Budget vs. Actual Consumption:** Real-time visual metrics comparing approved annual budgets against actual invoice totals.

#### ■ View-Only Mode for Readers

If your access level for a department is set to **Reader (View Only)**:

- Budget figures and remarks are displayed as clean, formatted text (e.g. ■5,00,000).
- The **Save budget** button and edit controls are hidden.
- You can review all department financial figures with zero risk of altering active budget data.

### 4. Department Admin Operational Workflow

Users with **Department Admin** permissions (\*e.g., Production Admin, Finance Admin, HR Admin\*) can manage budgets, invoices, asset allocations, and ERP synchronization:

1. **Saving Budgets & Snapshot Versions:** Editing category budget amounts and clicking **Save budget** automatically creates a new immutable version snapshot (\*e.g., v1.0, v2.0\*).
2. **Version History & Diffing (■ Version History):** Inspect revision diffs comparing current budget lines against previous versions, showing exact line-by-line monetary variances.
3. **1-Click Version Restoration:** Select any historical snapshot and click ■ **Restore Version** to revert active budget figures instantly.
4. **Microsoft D365FO ERP OData Sync (■ Sync D365 ERP):** Connect to Dynamics 365 FO OData feed. The app auto-detects copied OData text from clipboard, parses records, and updates database asset numbers.
5. **Searchable ERP Asset Combobox ('D365AssetPicker'):** When editing assets line-by-line or using ■ **Bulk Grid Edit Mode**, type keywords (\*e.g. 'Laptop' or 'HSINFA-000004\*') to pick and assign ERP asset numbers instantly.

### 5. Account Security & Password Management

Security is a top priority at HydraSpecma India. Follow these steps to manage your account security:

- **Changing Your Password:** Click ■ **Change Password** at the bottom of the left sidebar. Input your current password and a new strong password (minimum 8 characters).

- **Automatic Password Reset Rules:** Global Admins can issue temporary passwords for user accounts. Temporary passwords expire upon first login.
- **Session Sign Out:** Click ■ **Sign Out** in the bottom sidebar when using shared workstations.

## 6. Platform Navigation Quick Reference

| Module            | Route URL                  | Primary Purpose                                                                         |
|-------------------|----------------------------|-----------------------------------------------------------------------------------------|
| Dashboard         | <a href="#">/dashboard</a> | High-level CapEx/OpEx KPIs, spending summary charts, and recent activity logs.          |
| Budget vs Actual  | <a href="#">/budgets</a>   | Annual budget allocation, consumption tracking, and Version Control revision diffing.   |
| Expiry & Renewals | <a href="#">/expiry</a>    | Tracks hardware warranty, software license, and vendor contract renewal deadlines.      |
| Next Year Budget  | <a href="#">/planning</a>  | Future year budget forecasting, percentage uplift modeling, and category projections.   |
| Invoices          | <a href="#">/invoices</a>  | PO tracking, vendor billing register, and asset generation from paid invoices.          |
| Asset Register    | <a href="#">/assets</a>    | Hardware/software inventory, D365FO ERP sync, staff assignments, and bulk grid editing. |
